

Corrigendum

Corrigendum to “Solubility, liquid–liquid equilibrium and critical states for the quaternary system acetic acid–ethanol–ethyl acetate–water at 303.15 K and 313.15 K” [Fluid Phase Equilib. 373 (2014) 72–79]

Maria Toikka, Artemiy Samarov, Maya Trofimova, Alexandra Golikova, Nikita Tsvetov, Alexander Toikka *

The authors regret the errors printed in the texts of the headers for Tables 6 and 7 (typo in the numbering of components 1 and 2). The correct headers are reprinted below. The authors would like to apologise for any inconvenience caused.

Table 6. The experimental LLE data for the ternary system ethyl acetate (1) – ethanol (2) – water (3) for mole fractions x at 303.15 K, 313.15 K and atmospheric pressure.

Table 7. The experimental LLE data for the ternary system ethyl acetate (1) – acetic acid (2) – water (3) for mole fractions x at 303.15 K, 313.15 K and atmospheric pressure.
